- 2014 CSC 520, Computer Architecture Integrated new course project utilizing the SimpleScalar toolkit. This project allows the students to apply advanced class concepts to determine overall effect on system performance against standardized benchmark suites. The project is focused on cost/performance design concepts in modern processors.
- 2014 CSC 490/590, Special Topics Intro to Network Security- Developed and taught first offering of this course at USA. This required initial development of the syllabus and learning objectives, and lecture material. Course was a hybrid combination of CSC 580 & CSC 582 concepts in both an undergraduate and graduate form.
